8.30AM – 3.00PM

DESIGN THINKING FOR INNOVATION MEETUP

An opportunity for St Paul's School students and Suncorp graduates to interact and work together in using Design Thinking to solve authentic design problems

This is an opportunity to work with Suncorp Graduates to create innovative solutions to authentic design problems using a design thinking approach. The design problems the students will engage in and develop solutions to, are based on situations Suncorp are potentially dealing with every day. The workshop will foster a number of design thinking mindsets including empathy, ambiguity, optimism and iterative thinking. It will provide an opportunity for students to be exposed to and work with design thinking in an industry context. St Paul's School students will experience different ways of thinking and communicating their ideas and concepts in a collaborative, hands on, safe-to-fail, feedback rich environment. St Paul's students will learn from other experts in a variety of fields within Suncorp.

If you are interested and are in Year's 10-12, please [CLICK HERE](#) and complete the expression of interest form or e-mail Mr Osborne to express your interest.

SUNCORP

**Developing thinking
and problem solving
skills for the future**

**New ways of thinking
and applying concepts
in a collaborative,
practical safe-to-fail
environment**

**Working within an
industry context**

**Developing
innovative solutions
to real world
problems**

**Opportunity to
explore possibilities**
